

Careers

Working at the forefront of what is possible

What we do

Like millions of others, you probably know us best for the weather that you hear on the news or read on your phone. But did you know that our forecasts reach as far as space? Or that high profile organisations across the world – from governments, businesses and industry, to the emergency services and military, rely on our expertise to operate safely and efficiently?

Come and join us to be part of the weather and climate services we offer, these are some of the areas you could start your career with us:

Technology and IT

Technology is key to every area of our work. Our innovative, world class people enable us to stay ahead of the game, exploiting technology to keep people safe, enable industries to operate and Government to make key decisions.

Customer and stakeholder management

Business development, sales, marketing and product development professionals are key to our success. They use our scientific capabilities to meet the needs of our government stakeholders and our industry customers through a wide range of offerings.

Corporate services

With a clear understanding of what's happening within the organisation, our teams work closely with different areas and senior leaders to report on progress against objectives to help us be as successful as we possibly can be.

Forecasting and observation

Millions of people around the world rely on meteorological expertise and advice, making the Met Office the UK's primary location for forecasters and observers.

Science

With world-leading science and technology capabilities, the Met Office offers fascinating opportunities for scientists, scientific software engineers and scientific consultants.

Programmes on offer

Apprentices - Many apprenticeship programmes are on offer at all levels. These include Project Management, Commercial, Paralegal, HR, Digital and IT and Engineering. we are expanding our offering every year.

Industrial placements - 12 month Programme offering valuable experience in conjunction with your university programme. You will develop new skills through real life work, being part of a diverse team and having a clear development plan.

Graduates - We don't restrict ourselves to a one-size-fits-all graduate scheme because we like to give you freedom of choice when it comes to the area that you're interested in. There are graduate level opportunities across the organisation. Take a look at the different career options on our website as well as monitor our vacancies for suitable opportunities.
